## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments filed in the Appeal Brief of November 04, 2004 have been fully considered and are persuasive.

### ***Allowable Subject Matter***

Claims 1-3 and 5-7 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for controlling the production of articles of manufacture between a licensor and licensee. The sole independent claim recites the uniquely distinct limitations of "controlling a supply of labels from a licensor to a licensee to monitor the production of the article of manufacture; preparing a label by the licensee and encrypting a portion of the information by the licensor relating to the article". The combination of Indeck (U.S. 5,365,865) and Griswold (U.S. 5,940,504) disclose a conventional license management system that fails to show the interrelationships between the licensor and the licensee as required by the above underlined limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
